### SOPROEN AND JCP REGULATORIOS S.A.S. SUCCESSFULLY COMPLETE DEVELOPMENT OF COMPREHENSIVE PHARMACOVIGILANCE WEB APPLICATION

**Quito, Ecuador – Agosto 2024**

SOPROEN, developed an advanced pharmacovigilance web application for JCP Regulatorios S.A.S. This innovative system offers functionalities designed to enhance medication safety and regulatory compliance.

JCP Regulatorios S.A.S. specializes in assisting pharmaceutical companies in meeting Ecuadorian regulatory standards, from obtaining Good Manufacturing Practices (GMP) certification to securing sanitary registrations. With this new pharmacovigilance solution, JCP has significantly expanded its ability to support these companies through a reliable and efficient platform.

#### **Key Features of the System:**

- **Periodic Safety Reports:** Automated generation of periodic safety update reports (PSURs), essential for continuous monitoring of the risk-benefit profile of medications.
- **Risk-Benefit Analysis Reports:** Tools for creating detailed reports on the risk-benefit relationship of pharmaceutical products.
- **Scientific Literature Management:** The system allows for the storage and organization of scientific literature related to the pharmaceutical companies' medications, facilitating access to critical information.
- **Record Management:** Users can add records, with editing restricted to specific profiles and deletion limited to administrators.

- **Advanced Search Filters:** Users can search records by date, ID number, unique adverse reaction code, and attachment name, streamlining access to specific information.
- **Unlimited Attachments:** Attachments can be added without restrictions, enhancing documentation for each case.
- **Multi-Company Support:** The platform supports multiple companies, with user access tailored to the specific permissions of each organization.
